Why OCRE for engineering & design?

We have the best engineers to help you with your complex projects. We have the capacity to think, be bright and perform in all stages of an engineering cycle. Also when it gets difficult. Our style is to listen and to think along with our clients. This results in satisfying, innovative and cost-saving solutions.

We offer:

- Specialists for your engineering teams.
- Consultants and project managers to take care of project and process management.
- Engineering and designing knowledge-intensive, customised constructions for various industries.
- Our mechanical and structural engineers are passionate in conceptual, basic and detailed engineering.

OCRE is NEN 4400-1 certified.

OCRE is partner of IND (ministry of security and justice), we employ highly skilled migrants.
