

OCRE Health Safety & Quality

OCRE offers Health Safety Environmental (HSE) and Quality QA/QC services to the international Energy, Maritime and Offshore industries. Our professionals are well recognised for their management of safety, health, environment and quality, both on- and offshore. We adhere a behaviour-based safety approach for our employees and contractors. Our professionals are encouraged to engage in pro-active, responsible behaviour. This for their own safety and the safety of professionals in their sphere of influence. We focus and advise on timely safety plans and timely HSE engineering. Everything we can do before the start of project operations does minimize the risks, LTI and maximises the output quality.
